About Us

The founders has been in IT Technical and Consulting since 2005. We create a close connection to those you do business that has its own IT risks by simplifying solutions. At Yamin IT Solutions, we carry a suite of comprehensive ICT solutions and Professional IT Services to offer our clients cutting edge technologies required to succeed and support their business including full ICT Products and Solutions, IT Project Management, IT Consultation, and full Support and Services coverage. Our goal is to build a "Trusted Partnership" with our clients. We strive to implement and support your business in any IT needs as possible to make sure your business stays operational and receives capital returns on your investments in us.

Our Services

1. Cloud & Infrastructure Services

In today's digital and cloud-based world, your business performs only as well as your IT infrastructure. An agile and intelligent infrastructure not only helps you adapt to change quickly, it also powers innovation and enables new business models.

Whether you're going full-tilt to public cloud or taking a hybrid approach, we'll work with you to develop an IT infrastructure that's right for your needs. We can help you design and implement a cloud-ready infrastructure that will unlock your vision and unleash unprecedented performance.

We will advise on technology selection across a portfolio of managed cloud services to meet all your operational objectives and maximize your return on investment. Every business wants to innovate, cut costs and be more agile.

- Network Infrastructures.
- Managed Public Cloud.
- Data Center Structure.
- Virtualisation.
- Citrix & Remote Desktop.

- Managed Private Cloud.
- Hybrid Cloud Infrastructure.
- Servers and Storage.
- Office 365.
- Infrastructure Monitoring.

Our Services

2. IT Consulting and Advisory

Creating new business opportunity through technology, while preparing for what comes next requires expert guidance and constant planning. Whether you're expanding critical infrastructure or moving to a cloud-based service delivery model, you need to know what those opportunities really are and how and when to adapt them.

What you decide today will be reflected over years to come in maintenance effort, user satisfaction and IT costs. But what matters most is how your technology decisions support your business operations and goals.

- Strategic IT Consulting.
- Solutions Architecture & Design.
- IT Security Consulting.

- IT Systems Audit.
- Disaster Recovery Planning.
- Cloud Services & Infrastructure Advisory.

Our Services

3. IT Security

Traditionally IT security was managed with web and email defence, to fend off pesky spam emails and the few malicious attacks per year. But with the rise of crypto-currencies, the development of Dark Web marketplaces and continued online connectivity has come a new kind of business risk.

These changes to the legal and technological environment have rendered traditional managed services inadequate to provide complete protection. Pushing for the creation of Security as a Service.

Your security posture is 'the status of an enterprise's networks, information, and systems based on information assurance (IA) resources (e.g., people, hardware, software, policies) and capabilities in place to manage the defense of the enterprise and to react as the situation changes. Understanding the status of your security posture is the first step we provide in protecting your business.

- Network Security.
- Notifiable Data Breach.
- Business Security Assessment.
- Systems Configuration Review.
- Unified Security Management (USM).
- Penetration Testing & Vulnerability Assessment.

- Endpoint Security.
- Cyber Security Awareness.
- Systems Configuration Review.
- International standard ISO 27001, NIST , NESA.

Our Services

4. Governance Risk and Compliance services

Our IT compliance security consultants help clients identify vulnerabilities and assess real business risk, meet PCI, GDPR, ISO 27000, CBJ compliance's and other security compliance mandates more efficiently and effectively, devise security and governance programs that fit a client's environment, and help them recover from and prepare for a cyber-security breach.
Governance, Risk and Compliance, or GRC for short, refers to a company's coordinated strategy for managing the broad issues of corporate governance, enterprise risk management (ERM) and corporate compliance with regard to regulatory requirements.

DEFINING GOVERNANCE, RISK AND COMPLIANCE
GRC business policies, software solutions and services enable companies to implement, manage monitor and measure the effectiveness of their Governance, Risk and Compliance strategies. GRC strategies rely on clearly defined, objective measurable for providing companies with insight into the overall effectiveness in each area of governance, risk and compliance.

Because GRC strategies span the entire organization, these tools and policies require management and coordination across numerous departments in an enterprise, including IT, management, security, compliance and auditing.

Our GRC Team offers consultation services for many compliance mandates, including:
• PCI DSS   • GDPR   • ISO 27000   • NIST
• Compliance & Privacy Solutions   • Risk Management & Compliance
• Ethical Hacker Services

Our Services

5. Backup & Disaster Recovery

In today's modern business environment data is the lifeblood of your organisation. Keeping your company's data safe and secure is not only critical for you, but with the notifiable date breach laws and the GDPR, it is now imperative for your customers safety.

Protecting your data from threats such as disasters, accidental deletions, recovery from cyber threats like ransomware, malware or internal threats is key to business reputation and survival.

• Enterprise Backup.
• Unified Backup & Continuity.
• Business Continuity.
• Cloud Backup.

Our Services

6. IT Services Managed

Our Managed Services began in 2007 as a small team managing the businesses IT systems. Since then it has continually expanded in size and scope as businesses rely more and more on their IT.

Today Managed Services includes the people and the technology to allow you to focus on your core business, for secure, smooth and efficient IT, without problems, issues or breakdowns.

Our Business Essentials suite includes a wide range of optional IT services, so we can select only what your business needs to function to build the perfect Managed Services package for your organisation.

- Monitoring.
- Maintenance.
- Continuity Services.
- Backup and Restore Services.
- Bandwidth Control & Monitoring Services.

7

Our Services

7. Helpdesk Support Services

Tired of waiting for IT support that never arrives? Emerging IT gives you fast and friendly Help Desk, Onsite and 24/7 Support with speedy issues resolution and the fastest SLAs in IT.

Our IT retains a dedicated team of IT technicians for helpdesk, phone, email and onsite IT support. With a tiered escalation structure and four levels of technical skill to fall back on, specialist expertise is always on hand to resolve the most complex network issues quickly and easily.

Our Support teams are live from 8:30 AM to 6:00PM every business day, with the option for 24-hour support and weekend support if needed. We can basically tailor our support hours to whenever your business needs.

• 24/7 Technical Support.

Our Services

8. Design & Development

Graphic design is art with a purpose. It involves a creative and systematic plan to solve a problem or achieve certain objectives, with the use of images, symbols or even words. It is visual communication and the aesthetic expression of concepts and ideas using various graphic elements and tools.

- Graphic Design.
- Graphic & Digital artwork.
- Social Media Marketing
- Logo Design.
- Web site Design.

9

Our Services
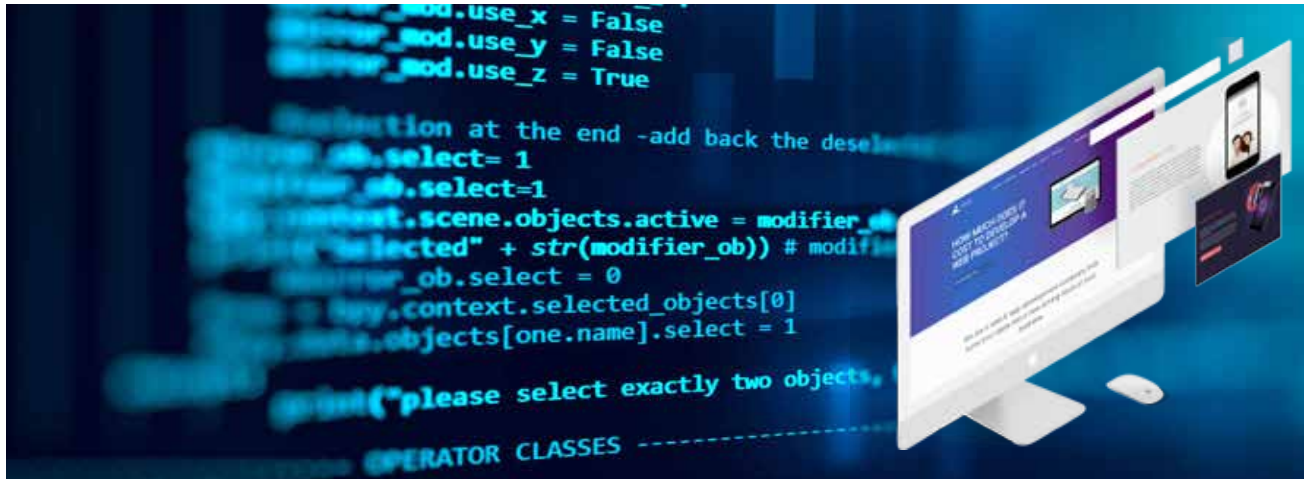

9. Customized Web Application

Custom software development is the designing of software applications for a specific user or group of users within an organization. Such software is designed to specifically address these users' needs better than more traditional and widespread off-the-shelf software can.

We develop software to optimize daily activities in your business. We comprehend just the right approach to handle software development for small, medium and large-scale projects. We provide software applications at low cost without compromising quality.

The biggest benefit of custom software is that it provides features that off-the-shelf software doesn't. Designing an application with your organization's needs in mind typically leads to an increased level of productivity once the solution is implemented.

Our Services

10. IT Training

We at Yamin IT Solutions believe that training presents a prime opportunity to expand the knowledge base of all employees, but many employers in the current climate find development opportunities expensive. Employees attending training sessions also miss work time, which may delay the completion of projects. However, despite these potential drawbacks, training and development provide both the individual and organizations as a whole with benefits that make the cost and time a worthwhile investment. The return on investment from the training and development of employees is really a no brainer.

What are the Benefits?
• Improved employee performance.
• Improved employee satisfaction and morale.
• Addressing weaknesses.
• Consistency.
• Increased productivity and adherence to quality standards.
• Increased innovation in new strategies and products.
• Reduced employee turnover.
• Enhances company reputation and profile.

Why with us?
We provide plan for all IT staff to take what is necessary for their company and work with specified and customized courses, with flexible schedule and training location.
